This is a very strong showing at 44% above plant average. The pattern shows locations on all the major arterials, heavying up in the highest circulation areas. No make-goods were requested, as all locations were acceptable and in good condition.

COMMENTS ON PLANT: (Condition, Structures, Painting Ability, Lighting, Cooperation, etc.)

This is a prime rotary plant. These are major areas (Winter Park, Pine Hill, etc.) with no thirty-sheet coverage, so the bulletin remains the only medium available to deliver advertising messages.
